

SupaSecure **TS008 CERTIFIED** **LETTERPLATE** ENHANCED SECURITY

Hardware that starts with **you.**

SupaSecure **TS008 CERTIFIED LETTERPLATE** ENHANCED SECURITY

for composite, timber, aluminium and UPVC doors

Clever security features
combined with considered design,
high performance stainless steel
and simple installation.

TS008 is an **enhanced security specification** for letterplates. It covers attack methods including fishing, ability to manipulate the door lock, removing posted items and forced removal of the letterplate

ON THE INSIDE

TS008 Technology

Our new SupaSecure High Security Letterplate is

TS008 certified, Secured by Design approved, Kitemarked, ADQ compliant

and meets the requirements of the Postal Services Standard

Patented Design
Application no.
GB2576184

ANTI-FISHING TECHNOLOGY

Our patented anti-fishing fins operate with a smooth concertina action for clever, secure, restricted flap opening and a compact aesthetic

Fishing Deflection

An angled postal ramp designed into the aperture deflects items upwards to protect against fishing

Secure

A restricted opening angle of **80°** enables the TS008 letterplate to be accessible yet secure

Slim

The compact design of the internal half of the letterplate projects just **45mm** which looks discreet and allows the door to fully open

Integrated drainage channel stops water or condensation pooling, preventing corrosion

Effective weather sealing through a combination of external foam and internal nylon brushes

Mix & Match

Choose from 5 colours for the internal side of your door

ON THE OUTSIDE

SupaSecure Stainless Steel

Beautifully designed in **high quality stainless steel**, the Supa Secure letterplate features a matching stainless steel frame and flap, in six durable finishes, for a fully coordinated look

STAINLESS STEEL TECHNOLOGY

Contemporary design with matching stainless steel flap and frame, and a concealed operating mechanism. Tested to 1,000 hours salt spray for a long lasting finish & has achieved a 100kg flap pull test for enhanced security

Coordinated

Matching stainless steel frame and flap

Reliable

Cycle tested to 20,000 cycles for operational reliability

Beautiful

Concealed flap-operating mechanism for a seamless design

Strong

Achieved 100kg flap pull test for enhanced security

Telescopic

Suitable for door thicknesses 24mm-56mm or 61mm – 91mm with telescopic sleeve extender

Intelligent

Flap opens fully to 180° without abrasion

Durable

Tested to BSEN 1670 Grade 5 achieving 480 hours salt spray. Real-life tested to more than twice the standard to 1056 hours salt spray

Extreme Weather Sealing

Tested to BS 6375-1 achieving 150 Pascals water penetration, withstanding 2 litres of water per minute under gale force wind conditions

Simple Installation

Ready to fit - straight from the box to the door in one piece, no need to disassemble first

Fits standard aperture - no special fixings or routing required

Fast - fit it in under 2 minutes

Mix & Match

Choose from 6 stainless steel colours for the outside of your door
