Composite Door

Traditional Doors

Contemporary Doors

Why Choose an **Xtreme** Composite Door?

Composite doors offer the look and feel of a timber door without any of the inherent problems, such as cracking, bowing or twisting.

They have a high-density foam core which offers excellent strength and thermal performance, and a durable Glass Reinforced Plastic (GRP) skin to protect from the elements. GRP is the same materials that is used to make the hull of lifeboats - demonstrating just how tough it really is!

And unlike timber, composite doors are incredibly low maintenance - an occasional wipe over with a damp cloth will restore it to it's original finish.

Key to Glazing Icons

- These doors are our Triple Glazed options.
- Obscure glass choice not required.
- These require obscure patterned backing glass. See 'Textured Glass Options' on page 34.

All images portrayed in this brochure should not be reproduced without specific written permission from the manufacturer. Images, designs and colours are for illustrative purposes only and are only as accurate as the printing process allows.

Rosewood and Light Oak are available both sides. The wood effect finishes on the door and outer frame differ slightly due to the nature of different materials involved.

All information within this brochure is provided for guidance only and is given in good faith, but without warranty or guarantee of any kind, whether implied or expressed. Our policy is to continually improve products, therefore methods, materials and changes of specification may be made from time to time without prior notice.

Thermal Performance

Composite doors are much more thermally efficient than either timber or PVC, and our doors are manufactured to the highest quality standards, making them more thermally efficient by design.

The warm foam core allows the door to have a significantly better 'U' value than traditional timber doors, PVC skinned timber doors and steel doors, and our entire range meets with the requirements of the current Building Regulations.

There are various upgrades to glass options which increase the thermal performance of the door.

The combination should keep your home warmer and could help reduce your energy bills.

York

Door Furniture

Door Colour Options

Doors are supplied with white internal colour as standard, however coloured both sides is available on request. RAL numbers are for reference only. Different materials will give different shade variations when painted with the same RAL. Foiled frames and door slabs may appear slightly different due to the nature of the materials and light reflecting from them.

Standard Colours

We offer a range of 7 external colours with a white interior as standard.

Premium Colours

All of our doors and frames can be sprayed

and lead times apply

Composite Sidelights

For homes with larger openings, we offer a range of sidelight options to complement your door.

Colour Foiled Frames

Frames can be supplied coloured both sides on request. Frames can also be sprayed to any RAL number on request.

Anthracite Grey RAL7016 with White Interior

Slate with White Interior

Black Ash/Brown* with White Interior

Rosewood with Matching Interior

Rosewood with White Interior

Light Oak with Matching Interior

Light Oak

As with our doors, the frames can be painted in any RAL colour* of your choice with either a smooth or foiled finish.

 ${}^* \text{The foiled Black Ash/Brown frame may appear lighter than the black door in direct sunlight}$

Textured Glass Options

There are lots of textured glass options to choose from, helping you maintain privacy in your home.
